

## What is Bwcabus?

Bwcabus is a fully accessible local bus service, which operates within a specific zone providing both fixed route services and pre-booked demand responsive journeys, allowing you the possibility to travel where and when you want, in comparison with a conventional bus service.

The Bwcabus service enables people to travel between local towns and villages or connect to main line bus services to travel further afield.

Whether you need to access healthcare, local services, employment, training or to visit family and friends Bwcabus can assist. Our vehicles are low floor easy access and can accommodate buggies and a wheelchair.

### **WILL THE BWCABUS PICK UP FROM HOME?**

Bwcabus is a bus service and will collect passengers from their nearest bus stop.

The exceptions to this rule are:

- Passengers with mobility difficulties may be picked up and set down at or near to their home address providing it is safe and practical to do so. Passengers must ensure they inform the call centre agent of any mobility issues when registering for the service.
- Passengers living in rural and isolated areas where there are no designated bus stops may also be picked up and set down at or near to their home address providing this is on the public highway. The Bwcabus vehicles are unable to travel on private roads.
